

all natural, hypochlorous acid disinfectant

AQUAOX™ Disinfectant 525 is a Broad-Spectrum disinfectant that is 100 times stronger than bleach but contains no harsh chemicals, gentle on skin and produces no harmful fumes. The product's active ingredient Hypochlorous Acid (HOCL) mimics the HOCL produced inside the human body and unlike other disinfectants currently used against SARS_CoV-2, contains no bleach, alcohol or ammonia and completely safe for use in schools, daycares, dental and medical clinics, businesses and other public spaces.

Hypochlorous Acid is 80-100 times more effective than bleach

Alcohols lack sporicidal action and cannot penetrate protein-rich bacterial spores.

Hypochlorous acid is non-toxic and non-hazardous. Even, if it were ingested by accident, it causes no harm

POWERFUL, SAFE & NATURAL

- Ready-to-use Hospital Disinfectant
- Registered on EPA's List N for Use Against SARS-CoV-2*
- No toxic chemicals, fake scents, colored dyes or bogus botanicals
- No dangerous chemical residue left behind
- Non-toxic and non-corrosive
- Safe for humans and animals

EPA Reg No. 99392-2

* EPA expects all products on List N to kill all strains (variants) of SARS-CoV-2. Genetic changes to the virus do not impact the efficacy of disinfectants. List N disinfectants work by chemically inactivating viruses. The difficulty of killing a virus depends on its physical features, and mutations to SARS-CoV-2 have not changed the basic physical properties”.
